

1. [Bug] Flipping rectangles in "fully constrained" parametric sketch
2. TechDraw: PropertyFileIncluded points to wrong location in Snap package
3. [Bug] Keyboard shortcuts not working in undocked doc window
4. Changing Locale should let user know in the UI that a restart is recommended
5. [Feature Request] Shortcuts for Draft snaps
6. [Bug] Graphics Issues in Some Linux Configurations
7. [Feature Request] Backups for each project stored in their own directory to avoid
8. [Bug] LeadInOut dressup breaks simulator
9. [Feature Request] Enable KeyboardInterrupt (ie Ctrl-C) to work in the Python console
10. [Bug] NaviCube does not respond to MSAA settings in preferences.
11. [Bug] cannot change type of profile after addition of profile using Arch Profile tool
12. [Bug] [crash] PartDesign SubShapeBinder: crash and other issues when manual
13. [Task] conda freecad-feedstock is broken and consequently we have cross-platform
14. [Feature Request] Expanded Kerf width for Profile operation
15. [Bug] [regression] App::Part Shapes are infinite
16. [Bug] [Draft] SVG import does not work with plain SVG
17. [Bug] [regression] polar pattern fail
18. [Bug] [crash] Crash when creating a fillet
19. [Bug] Draft Snap Near is inaccurate when snapping to curves
20. [Feature Request] Create a 3D adaptive clearing operation
21. [Bug] Fail to load a project with arbitrarily named constraints in a sketch
22. [Feature Request] Always place the Transform tool's manipulator inside a selection
23. [Feature Request] [TechDraw] Ordinate dimensions
24. [Bug] [Regression] Pocket becomes a pad when next object after a polar pattern
25. [Bug] [TD] Bitmap hatching is not supported
