1. Vulnerability in Node-Fetch
2. Support for typescript@4.4
3. ReferenceError: self is not defined (snowpack)
4. The second alternative to AbortController support (#54, #68, #137)
5. fetching files renders invalid blob
6. Type is no longer compatible with fetch
7. isomorphic-unfetch: Consider making node-fetch a peerDependency
8. Promise was rejected with a non-error
9. TypeScript Error: has no exported member 'Body'.
10. XDomainRequest. IE 8 will not work when CORS requests
11. Typescript issue: weird dependency on node-fetch in declaration file
12. Add polyfill/support for Request
13. add support for aborting via AbortController
14. Regex tests
15. global default options and handlers
16. Run GitHub/fetch tests against this polyfill
